EDUCATION

Keimyung University & DigiPen Institute of Technology | Daegu, South Korea / Redmond, WA

B.S. in Real-Time Interactive Systems | GPA: 3.9/4.5

MAY 2026

Relevant Courses: Data Structures (CS280) / Computer Graphics (CS250) / Game Project (GAM150/GAM200/GAM250)

TECHNICAL SKILLS

Programming Languages: C, C++

Engines: Custom Engine based on OpenGL

Interpersonal Skills: Team Spirit, Communication, Respect

ACADEMIC EXPERIENCE

Keimyung-DigiPen RTIS | Student Game Developer | DAEGU, SOUTH KOREA

MARCH 2024 ~ Present

- Developed various graphics rendering demos using OpenGL and GLSL, deeply exploring concepts such as procedural geometric modeling, shadow mapping, and complex noise generation (CS250).
- Built and published a personal portfolio website utilizing HTML/CSS to showcase engine programming and graphics engineering projects.
- Strengthened foundational computer science skills by implementing complex data structures and manual memory management in C/C++ (CS280).

PROJECTS

Rescook | Producer

SEPTEMBER 2025 ~ Present

- Cooking-themed Stage-based Adventure Game
- Collaborated with a team of 4 and directed team operations as the producer, managing task distribution, project milestones, and acting as the representative speaker for major project presentations and milestone pitches.
- Spearheaded the architectural transition of the base CS230 engine from raylib to a custom OpenGL-integrated framework, taking full ownership of the engine's core systems and rendering pipeline.
- Streamlined team productivity by implementing a weekly sprint meeting structure to clarify team milestones and goals.

OMG Corp. | QA

MARCH 2025 ~ JUNE 2025

- Point-and-click Tycoon Survival Game
- Collaborated with a team of 4 and acted out as the representative speaker for major project presentations and milestone pitches.
- Engineered a flexible point-and-click player movement system by integrating Dijkstra's path-finding algorithm across a custom node-based map network.
- Continuously tested the game to identify and fix bugs, ensuring a stable gameplay experience

One-Day Santa | Producer & Generalist

SEPTEMBER 2024 ~ DECEMBER 2024

- Top-down 2D Shooter Defense Game
- Collaborated with a team of 3 and acted out as the representative speaker for major project presentations and milestone pitches.
- Designed the core game loop, including a scalable wave system and a resource-management mini-game.
- Hand-crafted most of the 2D pixel art assets and composed original background music and sound effects, establishing the game's cohesive Christmas atmosphere.

LEADERSHIP EXPERIENCE

Keimyung-DigiPen RTIS | Student President | Daegu, South Korea

MARCH 2025 ~ DECEMBER 2025

- Represented the student body of the department, actively managing communications between students and faculty.
- Organized, planned, and directed department-wide events such as seasonal LAN Parties and DigiPen Game Engineering Department Vacation Game Jams, as well as orientations for freshmen within 2025 and 2026.
- Fostered a collaborative academic environment and supported fellow students in their academic journeys.
